COCKERILL® 1030

Modular and upgradable, the “Custom” medium calibre turret which “punches above its weight”.

Standard

- Two man crew
- Hunter killer
- Lightweight

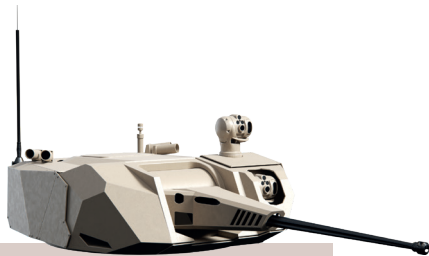

One man

- Affordable
- One sight
- One operator

Enhanced Design

- Advanced Capabilities
- High performance optics
- ATGM or rockets

Enhanced Armor

- Increased Protection
- One or two man crew
- Ballistic protection up to level 4

Robotic

- Wireless operation
- Optimized robotic integration
- Innovative communication

Amphibious

- Fully Marineized
- Ultra-lightweight
- Innovative composite shell design

Technical specification

Vehicle integration	Tracked or wheeled 6x6 or 8x8 chassis
Turret	Welded ballistic aluminium
Crew	RWS with one (gunner) or 2 (gunner & commander)
Main armament	30x173 mm chain gun
Secondary armament	7.62mm co-ax
Ammunition loading	Dual feeder with 150-200 ammunitions depending on the configuration
Options	Turret launched AT systems, Rockets, LWS, APS, Smoke Grenade Launcher (SGL)...
Protection	8 smoke grenade launchers
Sights	Commander (360°, stabilized) and Gunner sight (TV/IR/LRF)
D/R/I	Colour Day Cameras: 16.8 / 8.3 / 4.5 km Thermal Imager: 13.5 / 6.1 / 3.1 km
Elevation	-10°/+70° for UAV engagement
Ballistic protection	Up to level 4 STANAG 4569
Weight	1.5 tons in 2 man configuration

A lightweight low-profile turret that is specifically designed for Platforms that require reduced payloads.

High firepower

Modular

Affordable

Lightweight

<< This new remote weapon system combines a **high fire power** with a **30mm gun** integrated on a **compact and lightweight** platform. It is also **multi-mission** capable thanks to its high level of **modularity** and its different variants. It can accommodate 30x173mm guns with secondary armaments such as 7.62mm coax, anti-tank missiles or guided rockets capability. Last but not least, this light system allows for under-armour reloading, thus **maximizing the protection of the crews**. >>
